Bompani has been at your side since 1954, offering a wide choice of combinations capable of satisfying every type of requirement. The unmistakable Bompani style has always been a masterly blend of innovation and tradition:
attention to details is reflected in the lines and the simple, elegant shapes, designed and built to combine Italian style with state-of-the-art technology and the effective optimisation of time and space. The thrilling results are focused not only on visual perfection, but also on the user's experience of physical contact with the appliance.
When creating the Bompani 2008 collection, we set out to design objects which would not only be efficient and of high quality, in both materials and functions, but also fit perfectly into the kitchens - considering that today's kitchens are intended to be lived-in, felt and experienced to the full.
We therefore set out to express our traditions' immense worth through this new life style, constantly striving to respond in full to our customers' needs and demands.
Thanks to this ability to become as one with their surroundings, Bompani appliances accompany their users step by step as the stages of their lives unfold, and help them create an infinite number of recipes.

HIGHLIGHTS COOKERS

A tradition that is always renewed.

For over 50 years, Bompani has been designing and making cookers for your home: today, the company is proud to present its new 2008 collection of cookers, where it has concentrated the best of its skills and experience acquired over more than half a century of business. It is with renewed enthusiasm that they were designed, to ensure they are **modern** both **in their performance levels**, thanks to the use of the latest **technological innovations,** as well as in their **topical aesthetic appeal**, to make sure they blend into your kitchen setting with elegance and style.

So Bompani cookers prove to be **efficient and ergonomic** work tools, comfortable and elegant components of the domestic setting, pleasant and versatile partners in the preparation of your recipes.

Bompani cookers: quality that stands the test of time, quality that is always renewed.

KNOBS

The stylish ergonomic knobs fitted on Bompani cookers are made using the finest thermosetting plastic materials to withstand heat and always keep their beauty over time. The ignition built into the handle is a small but practical convenience in the everyday use of the appliance: a simple operation to turn on the burner.

HANDLES

Slimline, secure and easy to grip, the new handle was designed to guarantee ease of grip and is well-secured to the oven door.

It blends in perfectly with the profiles and slots on the front of the appliance, contributing to embellishing the overall image of the cooker.

CAST IRON PAN SUPPORTS

Strong, beautiful, and they know how to stay put.

Sturdy and long-lasting, the cast iron pan supports provide the best place for any size pan: perfectly stable, they always stay in place on the hob. Today, they are a key feature in the aesthetic appeal of your cooker.

ENAMELLED GRID

Firm, extended and enamelled, the new flat enamelled pan support gives a more sturdy, elegant and modern look to the cooker compared to the traditional vertical pan support. It was designed to be seated stably in its housing on the hob.

NEW LOOK

Stylish, trendy and attentive to details. In the new 2008 collection of cookers, all the main features that make up the appliance's aesthetic appeal have been renewed and come with style and elegance: the pan supports, knobs, control panel, handles, oven door and the front of the dishwarmer compartment.

DRAWER

High capacity, useful and fun, the practical and spacious drawer, available upon request, is very useful and functional to store away utensils and large pans. Mounted on four robust castors, it is fully mobile: it pulls out completely and can be repositioned easily and effortlessly.

COOLING FAN

It does not show off in any way, but it never overheats. Bompani cookers fitted with a cooling fan and with heat-absorbing double glazing in the oven door guarantee that the temperature remains cool on the touchable external parts of the appliance, avoiding overheating.

GAS BURNERS

Simple, practical and leak-free. The new burner on the 2008 cookers is secured beneath the hob with a seal system, which prevents any liquid from seeping into the cooker and damaging it.

CLASS A

Efficient, eco-friendly and energy-saving. The energy label gives consumers a standard comparison method for the energy consumption levels of household appliances. The new Bompani cookers marked class A guarantee efficiency and energy savings, while maintaining the highest operation performance levels.

COMPACT HINGE

Silent, but it opens gladly.

The new single-pin hinge makes for easy and effortless door opening in its super silent operation° Simpler and even more linear in shape, it is inserted with technological elegance in the interior of the door, facilitating cleaning and hygiene.

TELESCOPIC GUIDES

Useful and handy, a safe support.

The telescopic controlled sliding guides are very handy because they allow you to pull food out from the oven rack or dripping pan easily and safely with both hands, avoiding tipping. Partially and fully extracting guides available upon request.

DOOR AND INNER DOOR

Without frills, careful and rigorous.

The oven doors on the new Bompani cookers feature on the outside a single large glass surface, without any metal supports that interrupt the rigorous lines, and which tend to rust and accumulate dirt. The large glass surface inside the door also makes for easy cleaning.

Bompani
BOMPANI

BO 683 SK/N

Size: **100x65**

Finish: **STAINLESS STEEL**
Features:
HOB:
5 gas burners: 1 central wok, 2 big, 1 medium e 1 auxiliary
Flame Failure device
Integrated one-hand ignition
Cast iron pan supports
OVEN:
Multifunction electric oven with 7 programs
Net oven volume lt. 105
Electronic cooking start/end timer with display
Thermostat and additional safety thermostat
Electric grill
Large rotisserie
Oven light, 1 enamelled drip pan,
1 aluminium cake dish, 1 wire shelf,
1 rotisserie kit with 4 spits
Fixed panel
Natural gas setting

ACCESSORIES AVAILABLE ON REQUEST:
Large stainless steel drawer instead of fixed panel Code 0003396/I
Stainless steel back panel with utensil rail Code 0003394/I
Cast iron griddle plate Code 0003382/I
Rotisserie kit (8 spits) Code 0003110/I

BO 0H 3SA/E

Size: **WxDxH 99,8x59x74,5 cm**

Finish: **STAINLESS STEEL**
Features:
Maximum capacity 560 m^3/h
Electronic controls
1 motor
6 speeds + intensive one
Suction mode operation
4 halogen lamps of 20 W each
Self-supporting metallic filter

ACCESSORIES AVAILABLE ON REQUEST:
charcoal filter Code 0003622/I

100x65

Bompani

BO 683 AW/E

Size: **90x60**

Finish: **FINGERPRINT-PROOF STAINLESS STEEL**

Features:

HOB:

Electric ceramic hob
5 electric zones:
Front left: 1 high light Ø 180 (kW 1.8)
Central: 1 high light circular double circuit Ø 210-144 (kW 2.2-1.0)
Rear left and front right: 2 normal Ø 145 (kW 1.2)
Rear right: 1 normal Ø 180 (kW 1.7)
Residual heat warning light
Total power absorption 10.9 kW

HIGHLIGHTS
REFRIGERATION

You will see all sorts!

The new range of Bompani refrigerators features splendid new colours: **blue, red, pale green, custard, white and silver**, without forgetting the more traditional white and teak, and the ever-elegant steel.

An extraordinary variety of colours, sizes and types of refrigerators to satisfy all tastes, and all installation requirements with style and elegance in the home. Because today, refrigerators have become **real furnishing accessories** in our home! Under the elegant exterior, a technologically perfect appliance, which ensures **maximum performance levels** with **minimum energy consumption levels**, while **respecting the environment**, and... in **silence**!

Indeed, Bompani refrigerators have earned their classification in the highest energy efficiency classes, **they do not use CFCs and HFCs**, gases which damage the ozone layer in the earth's atmosphere, and they stand out for their special super silent operation°

Bompani refrigerators: quality that stands the test of time, quality that is always renewed.

HIGHLIGHTS
LAUNDRY

It's a question of class!

The new Bompani washing machines deserve their classification in the highest energy efficiency class, double A: number one in energy efficiency, number one in wash efficiency! They also stand out for their particularly practical use: in the front-loading washing machines, the large widened 180° opening appliance door, positioned higher up, makes it easier to load your laundry. With a capacity of 5 kg to 8 kg, you can wash large quantities of laundry and with spin speeds of between 500 and 1000 rpm and a depth of 33 cm, 39 cm and 60 cm, Bompani washing machines accommodate a multitude of needs.

The top-loading washing machines are an excellent solution to those who have a limited amount of available space. They are ergonomic and easy to use: load and unload all your laundry without having to bend down! Maximum safety is guaranteed by the automatic door lock and by an automatic drum realignment system which, at the end of every wash cycle, repositions it to open at the top. The "additional rinse" function does away with the last traces of detergent or washing powder. An electronic "antitoppling" device guarantees the utmost stability of the appliance and the optimal distribution of the load in the drum; the electronic speed control also makes it possible to use the minimum amount of energy necessary to improve the wash performance levels.

Wave goodbye to your laundry airer!

A dryer is convenient in the cold and humid months, and it becomes indispensable if there is no room to air your laundry. The condensation dryer can be positioned in any corner of your home; indeed, steam is condensed inside a special container which should be regularly emptied. The evacuating dryer on the other hand needs to be positioned in such a way as to guarantee that the steam can exit through the purpose-provided hose supplied. All Bompani dryers can hold up to 5 kg of laundry!

Bompani washing machines and dryers: quality that stands the test of time, quality that is always renewed.

Our laboratory tests have proven than Finish detergents get excellent results and additives keep your dishwasher in perfect working order. Finish and Calfort, the only brands recommended by Bompani.

DRYERS

Silent, handy, ...super!

With the new Bompani dishwashers we have tried to take away the burden of washing up pans and cutlery after a tasty lunch.
In the everyday tasks of a kitchen, dishwashers are an indispensable help. Appreciated not only for the time they save you, but also for their reduced water and electricity consumption levels, the new dishwashers in the Bompani collection blend in perfectly with any kitchen setting thanks to an ergonomic design, designed to combine practicality of use with attractive modern aesthetics.
A silent dishwasher that you forget is even there, designed to respect your silence and capable of offering high performance results. With noise levels reduced to a minimum thanks to special soundproof panels, the new dishwashers combine an efficient wash that is safe for your dishes with a very high energy yield, with extremely reduced water and energy consumption levels.
As a matter of fact, Bompani dishwashers have deserved the highest energy efficiency class, class A, which means maximum wash performance with the smallest energy consumption°.

5 washing programs
3 buttons: programs seletor, start and on/off
5 selected program warning leds: rinse, quick wash, light 45°C, normal 55°C, strong 65°C
Softener with 7-wash cycle retention°
Rinse-aid dispenser with an approximately 50-wash retention capacity
Acoustic power 51 db (A)
Maximum wash temperature 65°C
Water consumption: 16 litres only

Also available:

BO 05017/E WHITE
